PAR Group Ltd
Polyester (Terylene)
Food Contact Information

The manufacturer manufactures the Polyester (Terylene) fabric using continuous filament yarns.

Independently acquired test data for overall migration demonstrates levels significantly below the maximum upper limit of 10mg/dm² relating to European Regulation EU 10/2011, BS EN 1186-13 (October 2002 Method B). Specific Migration testing has not been carried out.

The material meets with the European migration requirements for contact with food for its intended use.
